Improved Art Lamp for The Library Table

The orpdinay art lamp does not al ways justify its title. Frequently it happens that the shade is not artistic and the lamp provides a glaring spot of light on a brightly polished table, white the rest of the room is only dirnly lighted. There is a very lovely art immp

made in Chicago, equipped with an adapter that is an Improvement upon the average art lamp with its one spot of bright light. This new lamp not only lights the area directly beneath it, but owing to its special adopter it will provide when desired a good general illumination of the entire rooma soft, meliow flood of light that makes every corner as well lighted as tion, including friends and relatives, the table upon which the lamp stands.

Lighting, Installations

A very good lighting linetaliation Regensburger, D. D., of Syracuse, who can become very inefficient, in a short is well known among German Catho- time if it is not properly pared for. Tests have shown that the collection of dust and dirt may often cause a cent. Many of the large offices and priesthood, securing his admission into department stores clean their highling units at regular intervals, and if this practice were followed in the home more satisfaction would result. Too many times the housekeeper thinks of dusting the books and brica-brac before the lamp globes, so that when her time is limited, the lighting equipment is overlooked situgusher. The lamps, reflectors and globas should receive prompt attention on every dusting day.

> Electricity Befriends the Farmer and His Wife

Keur Cypross Ind., ja a rich river bottom farm owned by an enterprising farmer, Chris Habn. Corn is one of his chief crops, and owing to overflows from the nearby river he has to conditions are right. This has always means long days in the field with his machines. He takes good care of them, and even when he gets in very late he likes to give his machines an inspection so they will be ready for work early the next day.

Poor lighting made this inspection rather difficult after dark, so he put in an electric power and light plant the hetter to me by. After a good farm where he studied two years. He left supper he now turns on the electric lights in his tracter shed, gets a "trouble lamp" with long extension cord and goes at the tractor.

This electric plant not only enables me to get my work done when I ought to," says Mr. Hahn, "but it gives my wife a whole lot of comfort, too. figure that it is poor policy to expect my wife to walt until she is dead and gone to Heaven to get away from the gloom and drudgery of kerosene lamps, carrying water, turning the cream separator and doing other bouse chores."

Electricity not only befriends the
